Education

Institut Teknologi Bandung

Bachelor of Engineering in Informatics

August 2020 - October 2024

CGPA: 3.76/4.00 (Cumlaude)

- Relevant Coursework:** Algorithms and Data Structures, Software Project Management, Database Management, Application Development, Parallel and Distributed Systems, Advanced Machine Learning

Publications & Awards

Effective Intended Sarcasm Detection Using Fine-Tuned Llama 2 Large Language Models

Singapore

International Conference on Advanced Informatics (ICAICTA 2024)

September 2024

Fachry Dennis Herald and Fariska Zakhralativa Ruskanda

- Best Paper Award.** Fine-tuned Llama 2 with QLoRA on **21,599 samples**, achieving **0.6867 F1** for sarcasm detection and **0.90 accuracy** for pairwise sarcasm identification.

RubBot Waste Recognition System

Institut Teknologi Bandung

Green Our Campus Paper Competition

November 2023

- First Place Winner.** Prototyped a Vision Transformer-based waste classifier connected to an IoT sorting system.

Teaching Experience

Institut Teknologi Bandung

Bandung, Indonesia

Course and Lab Assistant, Software Engineering Lab

August 2022 - July 2024

- Led labs and exams for Programming Fundamentals (Haskell and Python), Software Engineering, Software Project Management, and Human-Computer Interaction.
- Mentored 30 students** through final projects and wrote programming exercises and assignment materials.

Work Experience

CSG International

Jakarta

Software Developer Engineer II

April 2026 - Present

Enterprise order-management software for telecom and financial services.

- Built a **Java service that converts English and Mandarin emails into structured order-status data**, routing uncertain output to manual review. Delivered it in **2 days** and it was selected for a **Mobile World Congress Barcelona 2026 demo**.
- Built a **document-to-quote workflow** that extracts RFP requirements, qualifies sites across providers, and creates configured customer quotes and orders, reducing a process that took **hours to a few minutes**.
- Built a tool that converts natural-language mapping rules into executable transformation scripts, automating a manual customer-onboarding step and earning **second place in CSG's internal AI competition**.

Software Developer Engineer I

January 2025 - April 2026

- Built an MVP that converted network service requests into API transformation scripts, contributing to a joint project that won the **TM Forum DTW 2025 award**.

Paper.id

Jakarta

Software Engineer

November 2023 - December 2024

Business invoicing, payment, and financing platform.

- Built a shared Go payment engine for **QRIS, bank transfers, virtual accounts, and cross-border remittance**, reaching a **99% success rate** and **IDR 4 billion** in monthly payment volume.

Suitmedia

Bandung

Software Engineer Intern

May 2023 - September 2023

- Built a **Laravel CMS with 35 configurable menus and 50 API endpoints** from Figma designs.

Technical Skills

- Programming Languages:** Java, Go, Python, PHP, JavaScript, Shell
- Backend & Data:** Node.js, Fastify, Laravel, JAX-WS, PostgreSQL, MySQL, Oracle
- Infrastructure & Messaging:** Docker, Jenkins, AWS, Google Cloud, RabbitMQ, Kafka, OpenTelemetry
- AI Engineering:** LangChain, Ollama, MCP, PEFT / QLoRA, LLM Evaluation
