Work Experience

CSG International

Software Developer Engineer II

Jakarta

April 2026 - Present

Enterprise order-management software for telecom and financial services.

- Built a **Java service that converts English and Mandarin emails into structured order-status data**, routing uncertain output to manual review. Delivered it in **2 days** and it was selected for a **Mobile World Congress Barcelona 2026 demo**.
- Built a **document-to-quote workflow** that extracts RFP requirements, qualifies sites across providers, and creates configured customer quotes and orders, reducing a process that took **hours to a few minutes**.
- Built a tool that converts natural-language mapping rules into executable transformation scripts, automating a manual customer-onboarding step and earning **second place in CSG's internal AI competition**.
- Supported **10+ international banking demos as the primary engineer**, owning the supporting microservices and providing first-line technical support. Built reusable document and API tools for later events.

Software Developer Engineer I

January 2025 - April 2026

- Built an MVP that converted network service requests into API transformation scripts, contributing to a joint project that won the **TM Forum DTW 2025 award**.
- Made order retries safe after partial failures by **reusing existing plans**, adding **idempotent downstream calls**, and separating automatic retries from manual recovery.
- Migrated **50 customer-specific XML product definitions** and updated the corresponding Java services for a new configuration model.

Paper.id

Software Engineer

Jakarta

November 2023 - December 2024

Business invoicing, payment, and financing platform.

- Built a shared Go payment engine for **QRIS, bank transfers, virtual accounts, and cross-border remittance**, reaching a **99% success rate** and **IDR 4 billion in monthly payment volume**.
- Cut SMS and WhatsApp template creation from **hours to under a minute** by processing third-party broadcast requests concurrently in Go.
- Reduced payment query time by **20%** with table partitioning and automated reconciliation through RabbitMQ and asynchronous callbacks.

Suitmedia

Software Engineer Intern

Bandung

May 2023 - September 2023

- Built a **Laravel CMS with 35 configurable menus and 50 API endpoints** from Figma designs.
- Redesigned database tables and content APIs, reducing query time by **30%**.

Synpulse

Software Engineer Intern

Jakarta

October 2022 - December 2022

- Wrote **20 functional requirements** and mapped APIs for a core-banking migration, helping keep the project on schedule.
- Automated daily Excel-to-Oracle reconciliation with shell scripts, eliminating **15 minutes of manual processing each day**.

Education

Institut Teknologi Bandung

Bachelor of Engineering in Informatics

August 2020 - October 2024

CGPA: 3.76/4.00 (Cumlaude)

Awards & Recognition

Effective Intended Sarcasm Detection Using Fine-Tuned Llama 2 Large Language Models

International Conference on Advanced Informatics (ICAICTA 2024)

Singapore

September 2024

Fachry Dennis Herald and Fariska Zakhralativa Ruskanda

- Best Paper Award.** Fine-tuned Llama 2 with QLoRA on **21,599 samples**, achieving **0.6867 F1** for sarcasm detection and **0.90 accuracy** for pairwise sarcasm identification.

Technical Skills

- Programming Languages:** Java, Go, Python, PHP, JavaScript, Shell
- Backend & Data:** Node.js, Fastify, Laravel, JAX-WS, PostgreSQL, MySQL, Oracle
- Infrastructure & Messaging:** Docker, Jenkins, AWS, Google Cloud, RabbitMQ, Kafka, OpenTelemetry
- AI Engineering:** LangChain, Ollama, MCP, PEFT / QLoRA, LLM Evaluation
